

Childhaven Behavioral Health Services

Childhaven's Behavioral Health Services are provided to children and adolescents who are at-risk or are experiencing one or more of the following:

- Mental or Behavioral Health Problems
- Trauma
- Substance Abuse
- Suicidal Issues
- Depression, Anxiety, ADHD, Bipolar, etc.

Mental health problems can disrupt daily life at home, at school or in the community. Without help, mental health problems can lead to school failure, alcohol or other drug abuse, family problems, violence or even suicide.

Childhaven encourages the whole family to participate in services.
(For Youth ages 0-21)

Comprehensive Community Support Services (CCSS) and Core Service Agency (CSA)

Comprehensive Community Support

- Family Support workers are community based staff, available to children and youth with severe emotional disturbances, such as depression, anxiety, ADHD, etc.
- Family Support Workers provide services and resources to clients and their family to assist them in their daily life at home, at school or in the community.
- Promotes strengths which may aid the client in developing independent coping skills.
- Supports the client and the family in crisis situations

Core Service Agency:

Childhaven is a Core Service Agency (CSA) that coordinates care and provides essential services to children and youth who have severe emotional disturbances, such as depression, anxiety, ADHD, etc. For those eligible to receive services, the CSA provides or coordinates psychiatric services, medication management, everyday crisis services, and Comprehensive Community Support Services (CCSS). Families with children/youth that have mental health issues are encouraged to register with a CSA to assure proper access to all services the client may be eligible to receive.

Therapy and Assessments:

Childhaven offers mental health assessments, outpatient therapy and support services to children, youth, and their families. Individual, sibling, and family therapy are available to families in need.

- Therapists are trained in trauma-informed care and evidence-based treatment techniques.
- The child and youth-friendly facility utilizes play therapy and sensory integration to assist in treatment.

What are mental health concerns?

Mental health can include both emotional and behavioral problems. Emotional problems may include concerns about mood (usually sadness) or concerns about anxiety. Behavioral problems can include concerns with anger and violence, as well as difficulties paying attention.

When the problems start to interfere with school, family or everyday living it may be time to seek help.

Respite Care

Behavioral Health Respite

Time for a Break?

- Respite is available to families who have children or youth with significant behavioral, emotional or mental health issues.
- Childhaven Respite Staff assist the child/youth in developing social and emotional skills.
- Staff and caregivers work together to develop a behavior management plan for the child or youth.
- Respite care is not a therapeutic service, but referrals for therapy or other appropriate services are available at Childhaven.
- A regular weekly schedule is required and dependent on the severity needs of the individual child/youth.
- A recent mental health assessment is required to determine eligibility.
